TURKISH AUTOMOTIVE SECTORAL TRADE DELEGATION TO AUSTRALIA 21-27 SEPTEMBER 2025

- Export to 200 countries
- 37,2 billion USD total automotive Export in 2024
- 15 billion USD automotive supplier industry Export in 2024
- 78 billion USD foreign trade surplus between 2006 – 2024
- The second largest commercial vehicle manufacturer in Europe in 2024
- 13th largest motor vehicle manufacturer in the World in 2024

Türkiye

ULUDAĞ AUTOMOTIVE INDUSTRY EXPORTERS' ASSOCIATION (OİB)

Baran ÇELİK
Chairman
Automotive Industry
Exporters' Association

The Uludağ Automotive Industry Exporters' Association (OİB) was formed in 1991 under the title of Uludağ Vehicle and Auxiliary Industry Exporters' Association (UTAYSIB) with 246 members and exports of \$163 million under the umbrella of the Uludağ Exporters' Association. Having more than 9.500 active members as of the end of 2024, OİB is the only export representative of the automotive industry, which is the locomotive of the country's total exports. All exporting main and supplier industry companies in the automotive sector in Türkiye are members of OİB, a union of coordination for automotive sector exporters.

Continuously active for more than 30 years and with an export level of 32,3 billion dollars by the end of 2024, OİB's share in the total exports of ÜİB is 84 %. As such, it remains a determined leader in exports, a status it has maintained for many years.

The automotive industry, which exports a total of 37,2 billion dollars in 2024, ranks second in European commercial vehicle production.

The principal areas of business of the Association may be summarized as:

Increasing the export volume of the industry;

Informing its members about developments in foreign trade. Implementing the policies set forth by the Türkiye Ministry of Trade and the Türkiye Exporters Assembly
The automotive industry's role in the Turkish economy is steadily growing. Besides its potential for creating high-added value, the industry is at the foundation of advances in industrialization and technology. Its growth rate over the years and the export opportunities it provides have made it a significant presence within the Turkish economy.

Because the industry is so integrated with many fundamental and locomotive sectors such as iron & steel, petrochemicals, textiles, glass, electronics, and machinery, the input it contributes to these sectors, its sales revenues, the added value it creates, the real export value realized, its tax and wage potential have assigned it a key role in the economy. Moreover, the industry, with its raw material and auxiliary industries, also generates a huge volume of business and employment for the marketing, dealership service, fuel, financing, and insurance sectors, all of which are key factors in delivering automotive products to the consumer. These characteristics of the automotive industry make it a strategic sector that draws the entire country's attention and necessitates special planning designed specifically for the sector.

With this magnitude, the automotive industry provides employment opportunities to 300.000, 50.000 in the main industry, and 250.000 in the supplier industry. When dealerships, logistics, authorized, and special services are added to these figures, employment exceeds 500.000.

At present, the Automotive Industry has a 16,5% share of Türkiye's total exports. In line with our future goals, the companies that have invested in our country need to increase their capacities and we also must draw new main industry investments into the country. In addition, it is important to take the necessary steps in line with the technological transformation in the automotive industry

OİB aims to expand and strengthen its existing activities in line with industry developments and to prepare and assist exporters for this transformation with new activities. OİB works in close cooperation with industry stakeholders and member companies and plans its activities taking into account this transformation in the automotive industry.

IN THE AWARENESS OF SOCIAL RESPONSIBILITY

"Turkish Grand National Assembly (TGNA) Eminent Service Award"

In addition, the Uludağ Automotive Industry Exporters' Association has been recognized by the Turkish Grand National Assembly for its contributions to social responsibility projects; the Association's Technical and Vocational High School was commended with the TBMM Eminent Service Award." To meet the potential needs of the school in the period ahead, the OİB Educational Foundation (OEV), founded in 2011, has joined OİB members to support and

develop various projects initiated by the Foundation. Contributions to the various projects for schoolchildren are steadily growing.

QUALIFIED HUMAN RESOURCES FOR THE AUTOMOTIVE SECTOR: "OİB TECHNICAL AND VOCATIONAL HIGH SCHOOL"

While the role of the automotive industry in Türkiye's general economy is steadily growing, to meet the need of the sector for qualified human resources, the board of directors of the Uludağ Automotive Industry Exporters' Association (OİB) executed and took on all costs for the building of the "OİB Technical and Vocational High School," which it has now transferred to the ownership of the Treasury, with usufructuary rights belonging to the Ministry of National Education. The school started to operate in the academic year 2010-2011; it accepts students through the selection and placement central exam that is administered throughout the country.

Equipped with the latest technologies, the school is an exemplary project and provides 7 different curriculum programs. The OİB Technical and Vocational High School is a major educational complex with physics, chemistry, and biology laboratories that serve 720 students. Other facilities feature 6 workshops, 24 classrooms, a gymnasium for 720, a 300-capacity boarding facility, a 511-capacity multi-purpose hall, and lodgings comprised of 4 apartments.

The largest integrated facility in suspension systems!
As ACV Suspension Systems Inc., we have been specializing in steering and suspension systems since 1975.

Today, we manufacture 3.5 million parts annually across our 50,000 m² facilities, carrying the responsibility of being a trusted player in the industry.

Our main product groups include steering and suspension parts, air springs, and air tanks.

We export 50% of our production to the EMEA region and 40% to the North American market, reaching nearly 100 countries worldwide.

We provide solutions to both original equipment manufacturers and the global aftermarket.

At ACV, we take ownership of our work, reflecting our dedication and quality in every product.

For us, manufacturing is not just a job – it's a responsibility. Because we believe:

"The one who loves their country the most is the one who does their job the best!"

As Turkey's first and only 100% domestic production NOx sensor manufacturer We have nearly 1100 types of NOx sensors. you can find them on our website. (pressureoxygen- oil sensors) * We have a production capacity of 25,000 NOx sensors per month and 70% of our capacity is full. * With the intense demands of our OEM and OES customers, our annual production is expected to reach 1.5 million units. In this direction, we are about to complete the investment of our second plant. This new facility will undertake the production of NOx and all other sensors and will produce ceramic chips for the first time in Turkey.*MCT NOx sensors are produced with our own software. If you can provide samples for a product that is not on our list, we can make custom production for you.* We are the 2nd largest NOx sensor manufacturer in Europe and serve OE suppliers.* We produce the world's first NOx sensor made of recyclable material (>70%) and green in colour.* We export to more than 30 countries in five continents, we are present in 107 countries.* We offer 1 year warranty. We are the first manufacturer in the world with "Product Liability Insurance" in NOx sensors.
